EDUCATION

ECE Paris

2021 - 2026

Engineering school specialized in Computer Science

- Major in Health and Technology
- International semester in New York

Baruch College | September – December (2024) | New York City, USA

- Integrated preparatory program

ACADEMIC PROJECTS

Computer Science Projects

2021 - 2024

projects of 5 students

- Developed a medical appointment scheduling application in Java.
- Created a website to manage students' skills using HTML, CSS, JavaScript, and PHP.
- Developed Dofus- and Monopoly-inspired video games in C.

PROFESSIONAL EXPERIENCES

Institute of Mathematics, Bordeaux

April 2025 – August 2025

Mission : Comparison of Deep Learning models for MRI image reconstruction from undersampled data.

Actions :

- Implemented three end-to-end reconstruction models (Unet, Automap, DeepCascade) using PyTorch and trained them on a public dataset.
- Performed fine-tuning and optimization through parameter and hyperparameter adjustment.
- Developed mathematical formulations of the models to demonstrate their stability.

Résultats : Produced results that served as a scientific foundation for two complementary PhD theses.

MP conception, Oyonnax

January 2024 – February 2024

Mission : Comparative analysis of file management solutions.

Actions : Evaluated and compared two solutions proposed by Canon and Microsoft for a landscaping company (APTV).

Résultats : Developed a strategic recommendation guiding the company toward adopting the Microsoft solution.

CERN, Cessy

June 2023 – July 2024

Mission : Recording of proximity sensors and GPUs in a database.

Actions : Used and managed dedicated software to ensure proper data recording.

Résultats : Contributed to the implementation of a system for encrypting and storing all proximity sensors.
